ABOUT ME

I am a dedicated Frontend Engineer with expertise in React.js and Bootstrap, currently enhancing my skill set in React-Redux, Tailwind CSS, Zustand, React Query, and Progressive Web App (PWA) development. I am passionate about tackling complex challenges and delivering seamless, responsive user interfaces that prioritize exceptional performance and usability. With strong communication skills, I excel both independently and in collaborative environments. My technical proficiency includes crafting efficient state management solutions, optimizing data fetching and caching processes, and implementing scalable frontend architectures tailored to business needs. I am committed to driving innovation and providing exceptional user experiences through modern web technologies.

EXPERIENCE

Mobile Application Developer   *August 2024 – December 2024*
Oxbridge Institute l kol. Yos sudarso, Medan

- Developed a cross-platform ERP-POS mobile application using React Native Expo with TypeScript for high code quality, reliability, enhanced performance and user experience through React Query for efficient data management and advanced state management zustand.
